

Series **Micra 150**

The Micra 150 is a compact, single-room heat recovery unit that is engineered to deliver optimal ventilation for residential and commercial spaces and is an ideal solution for apartments, cottages and tiny homes. Perfect for both new and renovated buildings, the Micra 150 offers a straightforward, ductless installation, making it an ideal solution for enhancing air quality and energy efficiency in individual rooms without the cost and complexity of adding ductwork

- Motor type: EC
- Bypass: Auto
- Reheater: Electric
- Control: Built-in control panel
- Casing material: Coated steel
- Humidity sensor: Optional
