

Series **Micra 60**

The Micra 60 is an advanced single-room heat recovery ventilator designed to efficiently serve larger spaces, such as apartments, cottages, tiny homes and small commercial premises. This unit operates independently, eliminating the need for connection to air ducts, making installation straightforward and hassle-free. Offering a highly effective solution for heat recovery, the Micra 60 ensures optimal ventilation and energy savings in a single, compact system

- Motor type: EC
- Bypass: Auto
- Casing material: Coated steel
- Humidity sensor: Optional
